Serious trucks.℠

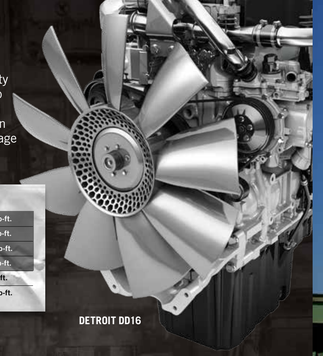
YOU DON'T HAVE TIME FOR PROBLEMS. OR ANY OTHER HEADACHES FOR THAT MATTER.

In your world, time is money. A lot of money. So you don't want excuses. And with Western Star® trucks, you won't get them. With over 40 years in the field, we know about building work trucks that deliver the durability and reliability you want and need. These are trucks engineered to be easily serviced in the field, backed by dealers who support you. Trucks that are easy to build up and add equipment to, that have powerful engines and equally powerful cooling options, and that have cabs that keep drivers safer and more comfortable. Nothing wrong with wanting it all.

Tough engines. Easy choices.

When it comes to choosing an engine, compromise should never enter the conversation. We offer a variety of engines, with the horsepower and torque ratings to spec the engine that has the brute strength you need to get the job done – including a Tier III engine option designed solely for off-highway use. There's no shortage of getting what you want around here.

ENGINE	HORSEPOWER	TORQUE
DETROIT™ DD13®	350-470	1250-1650lb-ft.
DETROIT™ DD15® TC	455-505	1550-1750lb-ft.
DETROIT™ DD16®	475-600	1850-2050lb-ft.
DETROIT™ SERIES 60® TIER III	425-500	1475-1550lb-ft.
CUMMINS ISL	260-380	720-1250lb-ft.
CUMMINS ISX15	400-600	1450-2050lb-ft.



DETROIT DD16

DETROIT BLUETEC

A GREAT PLACE TO CALL WORK.

Yes, the cab of the Western Star is nice. Extra insulation for quiet and comfort. Generous space between the seats for properly mounting PTO controls. Expansive two-piece windshield for greater visibility and durability. And a completely new interior. We could go on, but there's work to do.

STAY IN THE FIELD.

You work your trucks hard, so sometimes they need a little attention. Stars are designed for incredible durability and serviceability, with features like Grade 8 frame fasteners, copper brass radiators and in-dash power distribution modules so you can make quick repairs in the field and keep on working.

READY, WILLING AND MORE THAN ABLE.

Western Star® trucks are built to perform, with the high-quality components that stand up to the challenge of hard work. Sure, you can buy a less expensive truck. But that only costs you in the long run.

All hail the steel cab.

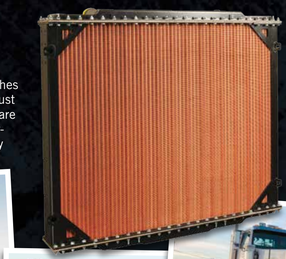
No aluminum or rivets here. Our galvannealed steel cabs are built to keep you safe. Extra gussets and reinforcements, bonded instead of riveted, precision welded for strength, then dipped and protected with a 17-stage e-coat process for long-lasting corrosion resistance and a superior paint finish. And for extreme-duty applications, Western Star also offers a severe service cab option with additional reinforcements to withstand anything you can throw at it.

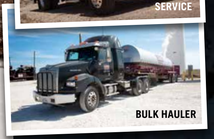
High clearance. Greater cooling.

Big rocks, rough roads, deep ruts. Put yourself above it all. With Western Star, you get the highest ground clearance available – and a truck that can handle terrain others can only dream about. Plus, superior clearance under the cab increases airflow and makes a strong cooling system even stronger.

Even our cooling packages are tough.

Eighteen hundred and seventy-five square inches of high-performance cooling area. But that's just the starting point. Our copper brass radiators are engineered with bolted steel tanks and rubber-isolated frame mounts for maximum durability and easy repair in the field.





YOUR COMPLETE OIL AND GAS SOLUTION.

With Western Star's full model line of trucks, multiple options and full customization, you can equip your operation with the dependability of Western Star for every application.

FOUR TIMES THE RAILS. FOUR TIMES THE STRENGTH.

Western Star's quadruple frame rail option gives the 6900XD a rating of 200 tons GCW, providing the strength to handle whatever you throw at it.
